National Association of Regulatory Utility Commissioners

Program Officer, Research Lab Job Description (September 2016)

Position Overview

NARUC's Research Lab seeks a new Program Officer, who will be responsible for managing a portfolio of research, education, and other projects that affect the regulation of the power sector.

- Must possess project implementation skills, be an excellent writer, and have strong attention to detail.
- Requires at least two years experience working with energy policy – particularly electricity.
- A bachelors degree is required, with a preference for a degree in an energy, environmental, regulatory, or project management field.
- Candidates with more education and experience qualifications may be considered for mid-level positions with greater duties and responsibilities.
- Candidates must be able to travel at least 10% of their time.

How to Apply

Please send a resume and cover letter to grjobs@naruc.org. Interviews will be handled on a rolling basis as candidates are identified and the position closes October 1, 2017. No calls please.

About the NARUC Lab

NARUC's Research Lab creates and runs projects that use research, papers, trainings, games, webcasts, and facilitated dialogues that provide answers to questions that State Commissioners face in regulating the electric power industry. These projects currently address transmission, natural gas, energy efficiency, wind, solar, and coal-fired generation, grid modernization, electric vehicles, infrastructure protection and cybersecurity issues.
